

2016 Summer Institute

Tap into the power of ed-tech and learn how to transition paper-based learning strategies to the web.

This 5-day institute is designed to:

- ✓ Explore learning strategies that tap the hidden potential within multiple Google applications.
- ✓ Introduce approaches to various web apps that promote deep comprehension and critical thinking skills.
- ✓ Leverage the use technology in the classroom to increase student academic conversation and engagement.
- ✓ Increase collaboration in all phases of student work including subject-matter comprehension, writing, content creation and peer editing.
- ✓ Explore the power of authentic audiences as your students demonstrate their learning through multimedia content creation.
- ✓ Provide ample time and highly differentiated support to help you develop a customized technology implementation plan suited to your needs.

Registration: \$600 (\$500/person for groups of 3+)
